

## TUTCO AFTERMARKET ELECTRIC HEATERS

Replacement Components is your single source for all your aftermarket electric heater needs. We offer a complete line of (113) of TUTCO aftermarket electric heaters.

Offer your customers the best. Our aftermarket electric heaters are manufactured by Tutco, one of the most trusted names in the business. These heaters go through rigorous testing, and they're compliant with UL standards with ETL certification. So you can be confident that every single one meets strict standards for reliability, efficiency, and safety.

Replacement Components' partnered with TUTCO to manufacture electric heaters specifically designed for use in Carrier, Bryant, Payne and ICP units. Whatever equipment your customer might be working on, with our extensive line of heaters, you'll be able to give them a product that's a perfect fit.

Plus we've designed these heaters to allow both single point connection and an alternate connection option, allowing more flexibility when powering the unit.

You'll also enjoy the flexibility of having of our entire heater lineup available, as you need them. There's no need to purchase an entire pallet. Whether you need one heater or a hundred, we have you covered – at very competitive pricing. And we've kept ordering easy. TUTCO aftermarket electric heaters sold through Replacement Components' use the same part numbers as TUTCO. Replacement Components also has a cross-reference tool available, and if you ever need assistance, Replacement Components' expert support team is always ready to help.
