

5 IN 1 HEPA WHOLE-HOUSE DUCT MOUNT HEPA AIR CLEANER WITH ULTRAVIOLET LIGHT AND PHOTO CATALYTIC FILTER

The FSDM900UV-VO-VS offers 5 in 1 air filtration and UVC light. It uses a combination uses HEPA, UVC Light (non ozone producing) and Photo Catalytic Oxidation.

For use in residential and light commercial applications where there are new construction odors, smokers, pets, cooking odors, water and sewer damage.

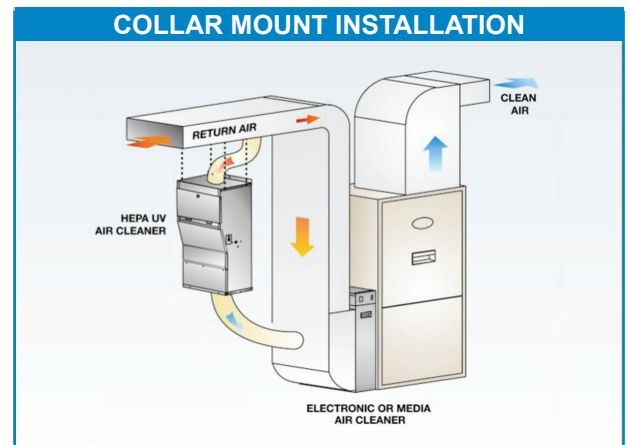

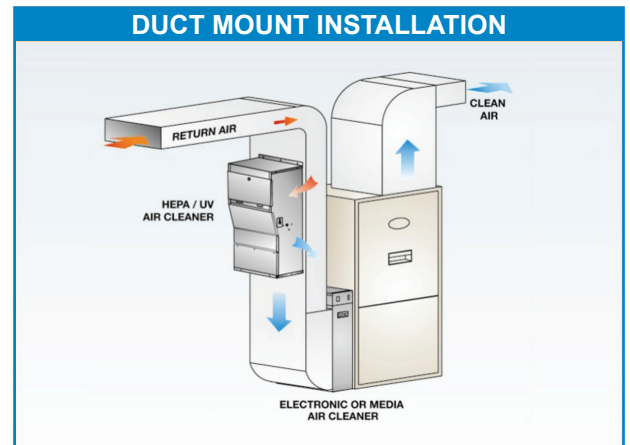

STANDARD FEATURES

- Carbon Prefilter protects the HEPA filter by capturing larger particles, like lint and hair.
- Long-life, 99.97% HEPA Media Filter removes particles 0.3 micron (1/84,000 of an inch) and larger
- Two UVC Lights are enclosed in a reflection chamber which intensifies the UV rays.
- Unique Photo Catalytic Oxidation Filter (PCO) has a very high surface exchange capability and allows UV light into the mass of the material - means there is absorption throughout the whole filter instead of just on the surface. The combination of the UVC light and the filter decomposes organic materials into basic molecules such as H₂O and CO₂.
- Carbon/ Potassium Permanganate Final Filter for removal of Volatile Organic Compounds (VOC's) and light gases.
- Powerful European, motor delivers up to 250 CFM (FSDM900UV-VO-VS) of pure air, without adding static pressure to the HVAC system.
- Plug-in Power Cord provides convenient electrical connection.
- Versatile installation can be duct mounted, collar mounted or used as a stand alone unit. Stands available with or without wheels.

CABINET CONSTRUCTION FEATURES

- One piece wrap, steel cabinet has powder-coat paint finish to provide rigid installation and durability.
- Pre-punched openings at back of unit and mounting template are provided for easier duct mount installation; no external ducting required.
- Pre-punched openings at top and bottom of unit facilitate collar mount installation.

**5-YEAR
LIMITED WARRANTY**

5 IN 1 HEPA PORTABLE TRUE HEPA AIR CLEANER WITH ULTRAVIOLET LIGHT AND PHOTO CATALYTIC FILTER

SPECIFICATIONS

MODELS	FSDM900UV-VO-VS	
Air Flow: FSDM900UV-VO-VS FSDM900UV-VO-VS (Variable Speed)	250 cfm	425 m ³ /hr
Carbon Prefilter: DM900-0855 Removes lint and large particles	Replace every 3-6 months	
Long-Life, 99.97% HEPA Media: DMH40400 Removes pollutants 0.3 micron	40 ft ² Replace every 2-4 years	3.7 m ² Replace every 2-4 years
UVC Light: DM900-0191 Strongest UV light intensity	2 Bulbs Replace every 13,000 hours or 2-3 years	
2 Substrate PCO Filter: DM900-0450 Removes Volatile Organic Compounds (VOC's)	Replace every 13,000 hours or 2-3 years	
Carbon/Potassium Permanganate Final Filter: DM900-0810 Removes VOC's and light gases	Replace every 1-2 years	
Complete 2-3 Year Maintenance Kit: DM900-1003 Contains 1 HEPA Filter, 4 Carbon Prefilters, 2 UVC Lamps, 1 Photo Catalytic Oxidation (PCO) Filter, 2 Carbon/Potassium Permanganate Final Filters, gloves	Replace every 2-3 years	
Cabinet Dimensions: H x W x D	29.5 x 16.25 x 12.75 in	74.9 x 41.3 x 32.4 cm
Intake Duct Fitting	14.5 x 3.75 in or 8 in (dia)	36.8 x 9.5 cm or 20.3 cm (dia)
Outflow Duct Fitting	14.5 x 4.37 in or 8 in (dia)	36.8 x 11.1 cm or 20.3 cm (dia)
Input Voltage	120 V, 60 hz	
Power Consumption	200 watts	
Power Cord	10.0 ft	3.05 m
Unit Weight	47 lbs	21.3 kg

HOW IT WORKS:

Millions of airborne pollutants are carried through the return air ducts of the heating/cooling system. The Air Purifier has been designed to be installed on the return air duct. A portion of this return air is by-passed through an opening on the back of the unit and passes through a 5-stage filtration system.

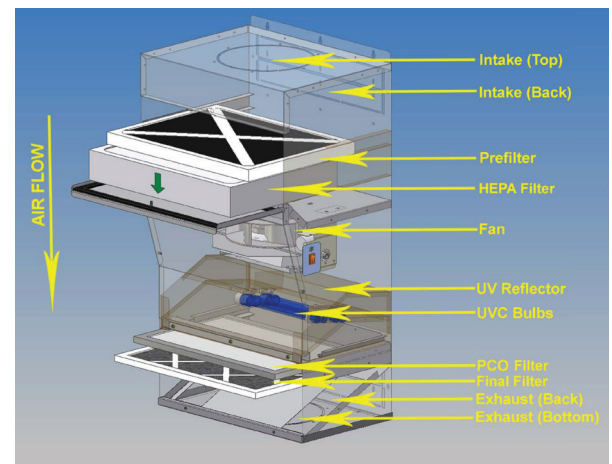

The air passes through a pleated Carbon Prefilter which captures lint and large particles to extend the life of the HEPA filter.

Smaller particles then pass through a long-life, 99.97% HEPA (High Efficiency Particulate Air) Media Filter which captures particles 0.3 micron (1/84,000 of an inch) and larger. The clean air passes through a reflection chamber where two Ultraviolet Lamps emit powerful UVC light rays. These are non-ozone producing lamps.

The Ultraviolet Lights are also used to activate the unique filter media located below the UVC lamps.

The Photo Catalytic Oxidation (PCO) Filter is a quartz media that is combined with a UVC light that helps to decompose organic materials reducing odors and VOC's.

A Carbon/ Potassium Permanganate Final Filter further reduces VOC's and light gases. Cleaner air is discharged back into the return air duct.

Manufacturer reserves the right to discontinue or change at any time, specifications or designs without notice or without incurring obligations. Performance of the Air Cleaners will depend on house plan design, duct design and heating/cooling equipment.
