

## MEDIA AIR CLEANERS FOR ALL NEW FURNACE & AIR HANDLER SIZES

The CMA Series Media Air Cleaners have been intuitively designed with outer dimensions that match original equipment furnace and air handler cabinets for quick installation (almost all brands on the market).

Designed to remove airborne contaminants down to 0.3 micron (1/84,000 of an inch).

Ideal for homes with smokers, pets and mustiness.

Helps prolong the operating efficiency of the heating and cooling equipment.

### STANDARD FEATURES

- Includes High Efficiency MERV\* 11 Media Filter, rated at 492 feet/minute, removes airborne contaminants down to 0.3 micron.
- Filter material is constructed of cellulose-free, continuous hydrophobic polyolefin fibers that will not shred or absorb moisture.
- Unique filter design features a structured density gradient with an electret charge for higher initial and sustained efficiency over the life of the filter.
- Extra deep, 5¼ inch filter, contains more media material than other filters on the market. More surface area means more collection area, longer filter life and lower static pressure.
- Perfect fit filter has a tight fit with the cabinet. Does not contain foam, sponge or fiberglass filler. Means all the air is passing through the filter and not through filler material, thereby maximizing the system's ability to clean the air.
- User-friendly, easy-to-change filter cartridge means no fussing with complicated combs or brackets.
- Filter lasts up to one year in standard applications.
- Reversible air flow. Mounts in any position.
- Limited 5 Year Warranty.

**MERV 11\***

\*MERV: Minimum Efficiency Reporting Value.  
Based on ASHRAE Standard 52.2

### CABINET CONSTRUCTION FEATURES

- Heavy gauge galvanized steel cabinet resists corrosion and provides trouble-free vertical or horizontal installation. Holes are provided to facilitate mounting to the duct work or air handling system.
- Durable powder coat paint finish on door resists corrosion.
