

Replacement Coils

Factory Authorized Parts™ have been designed and built specifically for Carrier®, Bryant® or Payne® equipment. These parts are the perfect fit, restoring equipment to its original performance and are available at your local Carrier, Bryant or Payne equipment distributor. **2-Year warranty** on all Factory Authorized Parts™ excluding compressors and commercial applied parts.

Features		Factory Authorized Parts™ Replacement Coils
System Performance	Product Design	F.A.P. Coils are manufactured to the same specifications as the OEM coils. They are built to current product designs and enhancements for optimum system performance.
	Fin and Tube Surfaces	F.A.P. Coils are built with the same coil surfaces as the factory for exact performance. Standard evaporator and condenser coils have copper or aluminum plate fins mechanically bonded to internally grooved tubes for maximum heat transfer capability. F.A.P. coils are also tested to comply with UL fatigue and burst strength requirements.
	AHRI System Performance	Since our F.A.P. coils are consistent in design and performance with OEM coils, the system performance ensured through the AHRI certification program is maintained.
	Quality Construction	F.A.P. Coils are made of quality materials and manufactured to Carrier's rigid quality standards to maintain their durability and integrity under design operating conditions.
System Reliability	Leak & Pressure Testing	F.A.P. Coils undergo stringent quality testing, including leak tests at 150 psig (1034 kPa) and pressure tests at 450 psig (3103 kPa). Testing requirements may vary by product and refrigerant.
	Optional Coil Coatings	Optional pre-coated, copper-fin and e-coated coils are available depending on the specific application. Coatings are corrosion tested per Carrier procedures and criteria to ensure proper application selection. Optional e-coated aluminum-fin coils have a flexible epoxy polymer coating uniformly applied to all coil surface areas without material bridging between fins. The e-coating process ensures complete coil encapsulation.
	Carrier® Warranty	F.A.P. coils are backed by Carrier's Replacement Components warranty, which warrants each F.A.P. coil to be free from defects in material and workmanship for a period of two years from date of shipment.
Safety	UL Approved	F.A.P. coils are UL listed and approved. Every F.A.P. coil is built to comply with internationally recognized safety standards, minimizing the risk of premature failure. UL also conducts ongoing, unannounced audits at the Carrier facility four times a year, ensuring the highest quality standards for our F.A.P. coils. 

Factory Authorized Parts™ are the **ONLY** replacement parts authorized by Carrier Corporation for use on Carrier®, Bryant® and Payne® branded equipment.

Factory Authorized Parts™ are only available thru your local Totaline® Sales Center.
